SCIENTIFIC DEMONSTRATION OF THE UTILITY OF THE WONDERFUL WIMSHURST - HOLTZ MACHINE.

The Only Machine in Existence by which the True X-Ray Discovered by Prof. William

Konrad Roantgen of Wurzburg, Bavaria,

There has obtained a general belief among the people, from the newspaper accounts of the wonderful powers of the X-Ray machine, that it is only used in locating fractures, bullets or deformities of the human body, etc. While this is true of the X-Ray muchine, as will be shown by the following cut

of an arm and hand, showing the complete fracture of the Radius and Ulna, of a patient treated at the MEDICAL INSTITUTE of DR. CZAR-RA, Nos. 619 and 621 PA. AVE. NW., it is not all that the WIM-SHURST-HOLTZ INFLUENCE MACH INE is being used for. In

DIAGNOSIS

this machine is especially beneficial and shows at once the real cause of any disease. The DIAGNOSIS is made without any INCONVENIENCE to the PATIENT and requires only a few seconds.

The healing powers of the Wim shurst-Holtz Influence Machine are simply wonderful, as has been proven by many Specialists, Ophthalmologists, Gynecologists, Neurologists, who have treated the different diseases with great success.

By this Static Machine Dr. Czarra, 619 and 621 Pa. ave. nw., is enabled to cure NEURALGIA, RHEUMATISM, SCIATICA, INFLAMMATION and KIDNEY TROUBLE. All forms of FEMALE WEAKNESS, especially WOMB and OVARIAN TROUBLE. Dr. Czarra also treats all BLOOD, SKIN and private diseases of both sexes. His treatment for pecially WOMB and OVARIAN 1800 BLOOD, SKIN and private diseases of both sexes. His treatment for the loss of vitality is certain and sure. Every case receives the per-

the loss of vitality is certain and sure. Every case receives the personal attention of Dr. Czarra.

The only way to form any conception of the wonders of the Wimshurst-Holtz Machine is to pay a personal visit to the Medical Institute of Dr. Czarra, 619 and 621 Pa. ave. nw., where a practical demonstration will be given by the Doctor himself.

We have not the space to give the bun dreds of testimonials received from greatful people, but we append the following as a fair sample of the many we have House of Representatives.

This is to certify that I have been suffering from Catarrh affecting the nose, have been treated by different physicians of eminence, but without obtaining a permanent oure. For the past six weeks I have been treated by different physicians of eminence, but without obtaining a permanent oure. For the past six weeks I have been treated for the above, also for General Wenthess, produced by overwork, by Dr. S. A. Czarra, of this city, with the past is treated. most beneficial results to myself. His medical treatment is most thorough and painstaking, and I have found his electrical treatment is very invigorating and panstaking, and I have found his electrical relation is very integrating and generally beneficial. These happy results impeline upon my own motion to return my thanks to br. Czarra in the shape of this testimonial and to add further that I was agreeably surprised at the moderation of his fees as compared with his great services.

I am, very truly yours,

GEN.R.N.

TIGERS WON WITH EASE

Georgetown Lost Through Fatal Weakness at Bat.

WAS INVINCIBLE

Outside of Third Inning It Was Well-Played Game-Team Fielding and Hitting the Features of Princeton's Work-Bach Gave Only One Hit in Five Innings.

Another cold day on Georgetown Field, and sadness reigns, for the Blue and Gray fell easy victims to the Princeton team yesterday afternoon to the tune of 10

lovers of good baseball couldn't help but be pleased with the excellent article of the national game put up for their side. A single error, a very bad overthrow, by Jayne, in the first inning, was the only musplay which marred their otherwise record. Javne more than redeemed himself for this by pitching a masterly game allowing only three hits to the Blue and

It was at but that Georgetown was awfully weak;, strong and weak hitters alike failed to come anywhere near touch ing Jayne safely, the single exception be-ing Fleming, who made three hits, the only ones made by his team, and he also scored its only run.

Since the strong games the locals played against the Washingtons they seem to have lost their cunning at bat, failed in enappy team work, and have forgotten Joe Kelly's splendid coaching. Poor hit ting is bad enough, but loose, ragged fielding and worse throwing are inexcusable and these faults are, in the main, the cause of yesterday's defeat. There's some thing out of gear, and Joe Kelly ought to be brought here for just about one day to look the boys over.

In striking contrast was the pretty team work of the sons of "Old Nassau." It was like clockwork, tongue and groove, and full of map and go, and the throwing almost

There was in attendance the largest crowd gray" rooters had little chance to grow enthusiastic they lost no opportunity to loudly applaud Princeton's strong work. The grand stand was filled to overflowing with pretty girls in their most fetching costumes and bright, pretty bonnets. The stand looked for all the world like a big bouquet. Among the visitors present were big delegations from National Park Seminary and the convent adjacent to the 'var-sty. The bleachers were filled and the side lines were crowded on the one side mainly by Princeton aluminae

Clancy occupied the rubber up to the fifth, but did not fare very well, being touched up in the third, the fatal inning, and, as in the Yale game, five hits were bunched three and two-baggers and singles, resulting In seven runs. He is a strong, cool pitcher but has not had enough work to do. Bach who finished the game from the fifth out, pitched a splendid game, and although he was wild at times, giving six bases or balls, he showed what he was made of by striking out six men.

In the fifth, Catcher Maloney's sere hand having again been burt, he ex-changed places with Lamb in right field, and the latter youngster finished out in splendid manner without a misplay. Flemingled at but with three hits, one a beauts ithout an error.

and Smith at second, whose fielding and rowing, like that of Barrett, was several times of the phenomenal order, are all star players on the Princeton team.

Outside of the third inning it was a well

in the first liming, and it gave the rooters hope, which was long drawn out and finally dashed to the four winds. George-town went first to bat, and Kelly, the first man up, fanned. Fleming planted would have been safe even if Javue had not thrown wide of first, but this he did and the ball went out among the carriages and ere it was fielded in, Fleming was home and panting on the bench. His sprinting qualities stood him in well. McCarthy walked, but Reardon and Lamb filled out.

and featureless, except for the catch "Bud" Smith made of Capt. Bradley's foul fly back of the players' bench. Both blanked in the second, the star

eatch of the inning being made by Rear don of Smith's fly long way back of sec ond bag. Then came the third, the fatal inning in

which the Tigers pounced on Clancy for five hits and scored seven runs, enough to win an ordinary game.

After Kafer had been disposed of from Fleming to Smith Barret was safe on Reardon's poor throw after a pretty stop. He promptly stole second and scored on layne's hit past second. Bradley followed suit with a hit over third, scoring Jayne. Wilson plunked one cut to right and Altman dropped another in short right garden, on which Bradley tallied and the runner stole second and scored with Wilson or Butler's long fly for three bases almost to the road at center. Five hits, and good ones, too, all in a row. But the fusicade was not yet at an end. Kelly pushed a strong one to Reardon, of which he made a good stop, but threw poorly to the plate to cut off Butler, who was tearing in at a flat 10-seconds' gait, and his score was added to the other five. Smith's fly was taken in nicely by Kelly and then Kafer came up for his second time this inning and his single scored Kelly. Barrett went out from McIntire to Smith Score, 7 to 1.

In the sixth, Kelly, the lucky boy, again reached first, and Fleming lifted a pretty single over second, his third hit, and it looked as If Georgetown might score again, but, alas! It was not to be, as McCarthy, Reardon, and Lamb were easy

The Tigers added one more run in the seventh, on Wilson being hit by Bach, and a stolen base, scoring on Smith's single, on which he and Kelly, who had singled, came near being doubled.

Scoring ended in the eighth, when the Tigers landed twice on the home plate, on Javne's free pass and steal, scoring on moment later when the ball, which had been quickly fielded in, was overthrown at second by Bach to catch the runner. Altman singled over third, but was caught napping at first.

The locals closed the game in one, two three order, and the big crowd again left the field sad and wondering when and

wherethe hoodoo came id. The same teams play again tomorrow afternoon, and George-town's luck may come back by that time. The score:

Stella Burke's Teeth Cut From the Oesophagus.

THE X-RAYS LOCATED THEM

late Had Lodged Crosswise in Her Throat-A Case That Greatly Interested the Medical Fraternity. Operation Necessary to Remove Them Described.

Stella Burke's teeth have been found and removed, and the unfortunate girl is steadily improving, and will unquestionably recover. There can now be no doubt as to her having awallowed them, for the missing molars, attached to the rubber plate, were found embedded in the flesh of the oesophagus.

The case, from its peculiar nature, has attracted widespread public attention, and ternity of the city. The operation, which was performed yesterday afternoon, at the Emergency Hospital, by Dr. A. Snyder, assisted by Drs. Lawrence, Turner, and Hooe, will be recorded in all medical journals as one of the most delicate and cientific that has ever been attempted In this city, and its entire success reflects great credit upon the surgeons. It was necessary to cut a gash in the girl's throat over two inches long, past the carotid artery, and the internal jugular vein, but so carefully was the incision nade that not a tablespoonful of blood was lost.

It will be remembered that Miss Burk swallowed the plate while asieep last Wednesday night. She was nearly strangled, and could articulate only in whispers, and could eat nothing but liquid food. Three unsuccessful attempts were made to locate the missing plate by means of the x-rays. Yesterday morning she was again submitted to the test, when a faint was produced, showing that the plate had lodged cross ties in the girl's throat. Then a specially prepared Nelaton probe, similar to those usually employed in exploring gunshot wounds, was rought into use. After carefully probeard, showing the location of the plate made to extract it by means of curved forceps, but it was discovered to be too firmly embedded in the tissues to be re-

She was then placed under the influ ence of enteroform, laid on the operating table and the more delicate operation begun. Each blood vessel was carefully taken up as the incision in her neck wa nade, while the surgeon's knife cut past the vital arteries and made an opening into the escophagus. Again the probe was brought into use, and with the aid of the curved forceps the opening was spread apart to permit the extraction of the plate. The whole operation occupied more fered no pain, and by the time she had re covered consciousness the incision had been carefully sewed up. There was no ir injury to the throat and the cut in her neck heal up she will be well again. Until this is done, It is necessary to

feed the young woman by nutrient enemata, as no morsel of food or even a drop of water can be permitted to pass her throat until the wound is entirely heated. On this account she requires al-

Astonishing Cure of Bladder and Kidney Trouble After Using Hobbs Sparagus Kidney Pills Three

Weeks.

About three years since I was attacked with a violent affliction of the bladder and kidneys. For a year I was unable to do any work, and for seven months out of that time I was confined to my bed, and the inflammation was so violent that I passed apparently nothing but thood. The care of my Physician, after long suffering, relieved me, but about September I of this year the disease again made its appearance more violently than at first. I was unable to work, and had no reason to expect anything but a long, painful illness, with but little hope of recovery. I saw your advertisement of Hobbs Sparagus Kidney Pills and bought one tox and took the medicine as directed. About the third day the good effects became apparent, and in less than three weeks I was completely cured.

I cannot express my thankfulness for my recovery, and shall recommend the use of your remedy to all my friends affected in like way.

Every word of this is true; the only fault I find is that it does not give a real idea.

like way.

Every word of this is true; the only fault I find is that it does not give a real idea of my suffering. Perhaps words will not express it, but your medicine's wonderful, and I thank you for new life and beath.

Address, SEARCH MEDICINE CO., 1011 Spring Garden St., Philadelphia.

I can descouer nothing in of one I shaw of non our to the Partet tours, if could out in good faith April 14, 4

The exact fairness to all and legality of this distribution is shown by the fact that no other such undertaking ever had the sanction of the Attorney General of the Paires States, over his own signature, as shows. Further, it is the only distribution in which the correct answer (which will be published July 3 next) has been placed in secret.

Two answers to this puzzle have been placed in the keeping of the Union Trust Company of Philadelphia, one copy to be delivered by them to the Postmaster General of the United States and one copy to the Attorney General of the United States on July 1, 1897, as is shown by the following receipt:

"Philadelphia, April 11, 1897."
States Fostmaster General, Washings, 1st day of July, 1897.
"THE INION TRUST COMPANY,
"D. HOWARD FOOT, Treasurer."

most the constant care of the physicians, and an extra nurse has been supplied to care for her.

The girl's general condition is extremely good and she suffered no shock as a

result of the operation.

Stella is a rather pretty young girl with comely features, and bears her affliction bravely, and last night was feeling in the best of spirits. All danger of any serious results has passed, but the physicians say that it will be several weeks in all probability before she will be able to leave the institution.

The history of the case will be es pecially prepared by Dr. Snyder and Dr. journals. It is doubtful if a similar opera tion has ever been performed by any phy-

PEARY WILL PROBABLY SAIL.

His Last Effort for the Ninety Degrees of Latitude.

The only thing now lacking for Peary's proposed Northern expedition is the formaindorsement of the Navy Department, and to secure the necessary leave of absence for Mr. Peary. This is said to have been assured him from the very highest authority in the country, and the first expedition, which is entirely one to prepare the way, will sail this summer

As outlined by Civil Engineer Peary and friends here the expedition is the most important one that has been planned for years. So carefully have the details been arranged that they expect it will ultimately end in his reaching that long-sought goal of the Arctic explorer, the North Pole. This will be Peary's last try for the 90 degrees of latitude.

Sentenced to Three Years.

James Smith, colored, convicted of stealing a gold watch from Mrs. Christine Mc Namee, was sentenced yesterday by Justice Bradley to a term of three years in the Trenton penitentiary.

Mr. Lewis Does Not Believe in a Monetary Conference.

A WASTE OF PUBLIC MONEY

The Democratic Member From Washington Introduces a Bill Providing for the Repeal of the Act Under Which Bluetallic Envoys Were Appointed.

James Hamilton Lewis, Congressman-at-Large from Washington, has no faith in the success of the mission of President McKinley's bimetalite envoys to Europe. Yesterday he introduced a bill in the House providing for the repeal of the act under which the envoys were appointed. He takes the position that the whole effort to secure a conference is undestrable. His views are

best stated in his own words. "The purpose of my bill is to repeal the law permitting this unnecessary a less commission, 'said Representative Lewis to The Times yesterday, 'and save to the people the \$100,000 to be spent under the measure. Of what avail can the conference be. Senator Wokott, upon his return from England, said that we could have international agreement to coin silver if only England would agree. This was an oft-told tale. We sliver men had been constantly urging the recognition of this obstacle as the reason why we should not independently and no longer parley with

Observe the situation. Engined in 1878 denounced the idea as a "craze." She had in the cabinet sold the same in 1878. In 1889, she, through Mr. Chapita, underecretary of the treasury, and Mr. Samuel this position, and upon a vote of 183 to 87, the proposition us was defeated.

"In 1893 a motion by Meysey Thomp-son, a member of the Lords, to co-operate toward an end of international agreement ing for the government, defeated by 262 it. This result was reported in May, 1894. proposition looking to the forming of a nmission. It was defeated, as the previous notion. Here, Sir William Hawourt deownced the attempt as an assault on England's privilege of demanding her defits dollar for dollar. Gladstone gave the reasons, because, as he said, Great

on the debts due ner. 'Sir Michael Bicks-Beach, chanceller of the exchequer, repents these sentiments, replying to Mr. Moreton Frewen's charges against England-and this during our cumpaign. Now we have in this week the ansuncement by England that 'she recure our commissioners as goests," but by such act must not be understood as giving color to any intention of appointing any commission to co-operate with ours.

"The London Times says the noxwork is fruitless and stily, as England has more reasons to refrain from co-operation now in the last two years become her debtor in a large and increasing volume. Germany refuses to co-operate. negotiated her bonds through England, and by her condition cannot assist. Italy has no voice. Crispi follows Austria and Eng-land, to whom Italy is in debt. Japan yields to the gold basis just now, because England, from whom she has bad to borrow \$250,000,000, demands the bonds to be so drawn. We had France and Belum so far as they can be got. So with

"Have we not tried to secure a conference four times? averaging an expense to us in all of \$114,000 a trip, counting the printing and circulation of reports, \$500,0007 and all with but one result-a decision to have more conferences. Here we are in debt, our expenditures \$40,000, 000 annually in excess of receipts. A measure of taxation is proposed to meet it. The supporters of this measure con-fess a deficit of \$20,000,000, when their bill is in full operation. Appropriations are made to an amount of \$1.210.000,000. all payable on a gold premium basis, and we are now to expend \$100,000 to provide a set of gentlemen a foreign excurded which has for its object the postponement of any action by this Administration on silver until after the next Congressional

Lewis. "If we are friends of silver let us be friends to her, irrespective of her enemies. Let us legislate for our money nedium, as we are assuming to do in the matter of the tariff not withstanding the protest of England, or Germany, or other sations. It is to this end that I would we at once, by abolishing the com-I am opposed to this senseless junket and innecessary expense."

New Steamer Reaches Port. New York, April 17. - The stenmer Fried-

rich der Grosse, from Hamburg, arrived this morning. She is a new steamer, and with the exception of one trip to Australia, this is her first voyage. She is 16,535 gross tons, with a displacement of 18,500; net tonnage, 6,764. She has acmodations for 100 first, 200 second class, and 2,500 steerage passengers. All modern marine appliances are to be found on board. She has quadruple expunsion engines and twin-screws. She was built at Stettin, by the Vulcan Company.
